

Pouch Bagger

The Pouch Bagger is a single pouch bagging machine which easily bags product in common, pre-made pouch style bags. Optional sealing units can be added to automate the sealing process. Options include a heat sealer and/or zip lock closer. The Pouch Bagger allows facilities to move away from costly and labor-intensive manual pouch bagging to affordable, high-speed automation. At up to 25 bags per minute, the Pouch Bagger can help keep up with consumer demands.

FEATURES

- Pouches can include multiple handle styles, tear notches, venting options, various films and die cut corners
- Interfaces with many fillers
- Robust, strong frame
- Requires little floor space
- Easy access for service and maintenance
- User-friendly program allows operators to create many set-ups with ease
- Clear doors around the machine for both safety and easy viewing of internal parts of machine
- Pre-stalled router for remote assistance

ADDITIONAL OPTIONS

- Produce Settler for reliable sealing
