

VST 5 PALLETIZER

This palletizer is designed to use a minimal amount of floor space while maximizing saving on labor costs. Its sturdy design and minimal moving parts result in a very low maintenance interval.

It can reach a capacity of 10 bags per minute. The manipulator positions your product with the utmost accuracy to offer high stacking quality. The user-friendly controls are very intuitive. The programmable controls offer a setup that will meet all of your requirements.

FEATURES

- Capacity of up to 10 bags per minute
- Multi-programmable stacking patterns are available
- Adjustable collar capable of palletizing up to a 50" x 50" pallet
- Touchscreen for easy operation
- Standard LAN connectivity for remote access
- Integrated pallet guide with adjustable stops allows for palletizing with up to a 3" overhang on pallet.
