

BAG 2 PAPER™

Volm's revolutionary new patent-pending technology includes a sustainable paper package for small consumer bags. This alternative to plastic packaging makes the Bag-2-Paper an innovative solution for packing your dry products such as potatoes, onions, garlic, and shallots. This vertical form, fill, and seal application uses paper and no plastic, does not require heat to seal, and can run at speeds up to 60 bags per minute.

FEATURES

- Compostable and recyclable
- Paper – no plastic
- Labeling instead of heat sealing
- Perforations for visibility and breathability
- Up to 10 color printing
- Up to 60 bpm

ADDITIONAL OPTIONS

- Different label sizes (label must be a minimum of 2.5")
- Application of print directly on the kraft paper
- Use of wet strength kraft paper for high moisture applications

MOST COMMON PRODUCTS

- Citrus
- Creamer Potatoes
- Garlic
- Nuts
- Onions
- Shallots

PACKING

- Volmpack 350CM Bag-2 Paper VFFS Bagger

SIZE

1 lb to 3 lb*

VFFS: Vertical Fill and Seal machine and bags are automated assembly-line product packaging systems. VFFS machines construct bags out of a flat roll while simultaneously filling the bags with product and sealing the filled bags.

* 5lb. package is not fully validated
