# VolmpackAnalytics

The information you need when and where you need it.

## IT REQUIREMENTS

- Gateway access to the internet via an Ethernet connection
- Unique IP address
- Open outgoing SSL connection ability

## KEY FEATURES

- Real time performance monitoring
- Batch machine statistics
- Global statistics for every weigher in your network
- Remote access

## BENEFITS

- Real time analysis from your desktop for measuring throughput
- Batch statistics monitoring to evaluate efficiencies
- Easily measure ROI with the machine global performance statistics

## Volmpack Analytics

Volmpack Analytics brings complete control of networked weigher equipment right to your Windows® desktop. Available as an add-on module for existing and new Volmpack weighers, Volmpack Analytics allows packers to get real-time information via their own network (or VPN).
